Employment

2015 –	Professor of Vision Science Institute of Neuroscience, Newcastle University, UK
2013 – 2015	Reader in Vision Science Institute of Neuroscience, Newcastle University, UK
2005 – 2013	Royal Society University Research Fellow Institute of Neuroscience, Newcastle University, UK
2001 – 2005	Postdoctoral Fellow Laboratory of Sensorimotor Research, National Eye Institute, NIH, USA
1997 – 2001	Wellcome Trust Training Fellow in Mathematical Biology Laboratory of Physiology, Oxford University, UK
1999 – 2001	College lecturer in Physics 1999-2000 at Christ Church, Oxford; 2000-2001 at Corpus Christi, Oxford.

Qualifications

2006 – 2009	Graduate diploma in psychology, with distinction, Newcastle University
1998 – 1999	M.Sc. in Neuroscience, with distinction, Merton College, Oxford University
1994 – 1997	D.Phil. in Theoretical Astrophysics, Merton College, Oxford University
1991 – 1994	B.A. (Hons.) in Physics, First Class, University College, Oxford University

Research Funding

2017 – 2018	Medical Research Council Proximity to Discovery Development Award <i>Gamified vision tests</i>	£24,259
2015 – 2019	Co-Investigator on European Training Network: <i>Full parallax imaging</i>	£561,134
2014 – 2017	Wellcome Trust & Department of Health Health Innovation Challenge Fund: <i>Accurate and patient-friendly measurement of binocular visual function using a 3D mobile device</i>	£965,699
2013 – 2018	Leverhulme Trust Research Leadership Award <i>Man, Mantis and Machine: the computation of 3D vision</i>	£960,528
2011	BSkyB <i>The immediate and medium-term effects of stereo 3D TV on visuomotor function</i>	
2011 – 2012	NHS Flexibility and Sustainability Award, <i>Avoiding Double Vision Despite Binocular Misalignment.</i>	£35,157
2010 – 2011	NHS Flexibility and Sustainability Award, <i>Psychophysical measures of inhibitory mechanisms.</i>	£18,586
2010	NHS Flexibility and Sustainability Award, <i>Suppression in intermittent exotropia.</i>	£8,000
2008 – 2011	Medical Research Council New Investigator Award, <i>Incorporating vertical disparity into computational models of depth perception.</i>	£301,264
2005 – 2013	Royal Society University Research Fellowship <i>A quantitative account of neuronal mechanisms supporting stereo depth.</i>	£659,671

Peer-reviewed scientific publications, reverse date order

73. Hands P, **Read JCA** (2017). True stereoscopic 3D cannot be simulated by shifting 2D content off the screen plane. *Displays* 48: 35-40.
72. Vancleef, **Read JCA**, Herbert W, Goodship N, Woodhouse M, Serrano-Pedraza I (2017). Overestimation of stereo thresholds by the TNO stereotest is not due to global stereopsis. *Ophthalmic and Physiological Optics*, 10.1111/opo.12371 .
71. Umeton D, **Read JCA**, Rowe C. Unravelling the illusion of flicker fusion effect (2017). *Biology Letters* 13:13 20160831.
70. Nityananda V, Tarawneh G, Errington S, Serrano-Pedraza I, **Read JCA** (2017). The optomotor response of the praying mantis is driven predominantly by the central visual field. *Journal of Comparative Physiology A*, 203: 77-87.
69. Yazdani P, **Read JCA**, Whittaker RG, Trevelyan AJ (2017). Assessment of epilepsy using non-invasive visual psychophysics tests of surround suppression. *Physiological Reports*, 5(5) pii: e13079.
68. Serrano-Pedraza I, Vancleef K, **Read JCA** (2016). Avoiding monocular artefacts in clinical stereotests presented on column-interleaved digital stereoscopic displays. *Journal of Vision*, 16(14):13, 1–14.
67. O'Hanlon CA, **Read JCA** (2016). Blindness to background: An inbuilt bias for visual objects. *Developmental Science*, doi:10.1111/desc.12478
66. Henriksen S, **Read JCA**, Cumming BG (2016). Neurons in striate cortex signal disparity in half-matched random dot stereograms. *Journal of Neuroscience*, 36(34): 8967– 8976.
65. Henriksen S, Cumming BG, **Read JCA** (2016). A single mechanism can account for human perception of depth in mixed correlation random dot stereograms. *PLOS Computational Biology*, 12(5):e1004906.
64. Nityananda V, Bissianna G, Tarawneh G, **Read JCA** (2016). Small or far away? Size and distance perception in the praying mantis. *Philosophical Transactions of the Royal Society B: Biological Sciences*, 371(1697) pii: 20150262
63. Serrano-Pedraza I, Herbert W, Villa-Laso L, Widdall M, Vancleef K, **Read JCA** (2016). The stereoscopic anisotropy develops during childhood. *Investigative Ophthalmology and Visual Science*, 57(3): 960-70.
62. Nityananda V, Tarawneh G, Rosner R, Nicolas J, Crichton S, **Read JCA** (2016). Insect stereopsis demonstrated using a 3D insect cinema *Scientific Reports*, 6: 18718.
61. **Read JCA**, Godfrey A, Bohr I, Simonotto J, Galna B, Smulders TV (2015). Viewing 3D TV over two months produces no discernible effects on balance, coordination or eyesight. *Ergonomics*, Jan 13: 1-16.
60. Yazdani P, Serrano-Pedraza I, Whittaker RG, Trevelyan A, **Read JCA** (2015). Two common psychophysical measures of surround suppression reflect independent neuronal mechanisms. *Journal of Vision*, 15 (21): 1-14.
59. **Read JCA**, Georgiou R, Brash C, Yazdani P, Whittaker R, Trevelyan A, Serrano-Pedraza I (2015). Moderate acute alcohol intoxication has minimal effect on surround suppression measured with a motion direction discrimination task. *Journal of Vision* 15(1):5 doi: 10.1167/15.5.6
58. **Read JCA**, Simonotto J, Bohr I, Godfrey A, Galna B, Rochester L, Smulders TV (2015). Balance and coordination after viewing stereoscopic 3D television. *Royal Society Open Science*, 2:140522.
